MELLERUD®

**Tiles, marble
and natural stone**

**Practical
guide with
tips from
professionals!**

PROFESSIONAL CLEANING AND CARE PRESERVING VALUE FOR DECADES

Cement residue, rusting processes, furniture marks or pores opened by polishing in which dirt penetrates – if tiles, marble or porcelain stoneware have been professionally installed the next task is to durably protect and maintain it. A task for MELLERUD's specialist products.

In comparison with all-purpose cleaners, MELLERUD cleaning and maintenance products are precisely tailored to stone: to its surface treatment, its absorbency and susceptibility to dirt. From post-construction cleaning to regular maintenance cleaning, they clean pore deep and without residue. They refresh colours and restore shine. They penetrate, seal or protect the floor, preserving its value and ensuring you will be enjoying them for a long time.

Certain products may not be available in your country.

1

HOW TO USE OUR GUIDE

Heavy-duty cleaning, post-construction cleaning, protection, care and/or maintenance cleaning: under each product you will find the relevant areas of application. In detail, the symbols mean:

Heavy-duty cleaning

Intensive cleaning at regular intervals to remove stubborn dirt. Opens pores prior to protective treatment. Gets rid of traces of use and old treatment layers.

Post-construction cleaning

Cleaning which is carried out in connection with a new build or once a building project is finished.

Protection

Water and dirt particles are no longer able to penetrate the surface. Stains are prevented. Used to preserve materials.

Care

Used to improve appearance and preserve the surface's natural beauty. Protects against mechanical stress and environmental influences such as drying out.

Maintenance

Regular removal of everyday dirt.

Are you looking for an overview? On pages 13 to 15 of this brochure you will find the best MELLERUD specialist cleaner for the respective material and area of application.

2

CEMENT RESIDUE REMOVER AND HEAVY-DUTY CLEANER

THE FIRST CLEANING IS THE MOST IMPORTANT

A grey cement residue, which remains after any amount of cleaning, ruins the most beautiful floors – irrespective of how well the tiles are laid. This is a case for MELLERUD Cement Residue Remover. It dissolves stubborn cement films without residues – even if the cement has already dried.

MELLERUD Tile and Stone Heavy-Duty Cleaner is the first choice for repeated intensive cleaning. The complex combination of acids cleans deep into the pores. When applied once to twice a year, it helps tiles retaining their shine. Moreover, it can be used in the kitchen and bathroom as well as on the balcony, patio or in the garage.

Check carefully if the floor is resistant to acid. If it does not react well to acidic products, use MELLERUD Cement Residue Remover for Marble and Calcareous Stone. In all cases saturate the floor with water. The stone absorbs the water so that MELLERUD Cement Residue Remover cannot penetrate the stone. This ensure that the acid acts on the surface and can thereby remove the limescale and cement residues.

1 MELLERUD Cement Residue Remover

Sheer effectiveness on all acid-sensitive surfaces – tiles, fine stoneware, ceramic tiles, terracotta tiles, non-calcareous natural stone as diverse as granite, slate, quartzite etc. These are often affected by cement residues and saltpetre efflorescence. Quick and intensive.

Available in 1.0 l and 2.5 l containers.

2 MELLERUD Cement Residue Remover for Marble and Calcareous Stone

MELLERUD Cement Residue Remover for Marble and Calcareous Stone helps against cement residue on sensitive surfaces such as marble, natural and synthetic stone. For all cement residues on acid-sensitive materials. Can be applied neat or diluted.

Available in 1.0 l containers.

3 MELLERUD Grease, Wax and Dirt Remover

Dried grease, oil, old wax and treatment layers and crusts, even old polishes are reliably removed from these surfaces: stone, tile, ceramic, plastic and metal. Ideal for the intensive cleaning of floors, window sills, kitchen and office furniture.

Available in 1.0 l containers.

4 MELLERUD Tile and Stone Heavy-Duty Cleaner

Powerful heavy-duty cleaning of tiles, split tiles, fine stoneware and other ceramic tiles and non-calcareous natural stones such as diverse types of granite, slate, quartzite, porphyry and basalt. For use in kitchens, showers, toilets, swimming pools and living areas. Ideal to clean balconies and patios.

Available in 1.0 l and 2.5 l containers.

MELLERUD RESTORES SHINE AND REFRESHES COLOURS

Whether glazed or not, ceramic tiles are the least complicated floor covering. Regularly cleaned, they look like new for many years and stay hard-wearing and hygienically clean even under heavy use. The best tile cleaning starts once the tiles have been laid. Colour, shine and decorative patterns only come into their own when building dirt and cement residue has been completely removed (see Cement Residue Remover and Heavy-Duty Cleaner). Afterwards you only need an occasional intensive clean and regular maintenance cleaning. Unglazed tiles need a little more attention. As a result of their porous surface they also need protecting and regular care to refresh the shine and act as a dirt repellent.

The weak point of hard-wearing tiles is often the grouts. So that cement-bonded grouts remain free of oil and grease stains, protect them with MELLERUD Grout Impregnator.

Untreated terracotta tiles retain their original appearance for longer when they are treated with MELLERUD Marble and Natural Stone Impregnator. To remove old treatment layers and for intensive cleaning, use MELLERUD Grease, Wax and Dirt Remover!

5 MELLERUD Floor Tile Care

Shine for all tiles. High-quality care treatment for glazed and unglazed floor tiles, split tiles, clay tiles, clinker, slate and Solnhofen tiles. Also suitable for synthetic and PVC floors. Ensures fresh colours and shine, long-term dirt resistance. Does not make floors slippery.

Available in 1.0 l containers.

6 MELLERUD Grout Cleaner

Hygienic cleanliness in the grouting of wall and floor tiles, in clinker, facing bricks, closers and natural stone. Greasy, oily, encrusted dirt, deposits of treatment coatings, cooking and baked-on residues stand no chance.

Available in 0.5 l containers.

7 MELLERUD Grout Impregnator

Grouting stays looking good for a long time. Breathable specialist impregnator for all absorbent grout materials. MELLERUD Grout Impregnator protects against oily, greasy and aqueous dirt and moisture penetrating the grout. Minimises the formation of stubborn limescale residues and deposits and makes cleaning easier. Suitable for interior and exterior use on wall and floor tiles.

Available in 0.5 l containers.

8 MELLERUD Heavy-Duty Intensive Cleaner

Every floor covering is firmly under control. Shine and wax coatings, treatment coatings, stubborn dirt, grease crusts, yellowing, nicotine, oil and soot deposits are removed more thoroughly and easily using MELLERUD Heavy-Duty Intensive Cleaner. It thoroughly cleans tiles, natural, synthetic and concrete stone, synthetic floor coverings and PVC-coated wood and metal. It can also be used prior to a new protective treatment.

Available in 1.0 l containers.

9 MELLERUD Terracotta Care Lotion

Natural care. Natural nourishing ingredients clean and treat terracotta, terracotta and clay tiles. MELLERUD Terracotta Care Lotion protects waxed surfaces and gives a light shine in one step. Simply add to the cleaning water – and enjoy your valuable terracotta floors for a long time.

Available in 1.0 l containers.

10 MELLERUD Wall and Floor Tile Cleaner

Ideal to preserve the natural beauty of surfaces in the bathroom, toilet and living area. MELLERUD Wall and Floor Tile Cleaner acts quickly, intensively and without scrubbing against water and limescale stains, soap residues and dirt – for regular cleaning and care.

Available in 1.0 l containers.

CARE AND PROTECTION FOR MARBLE AND NATURAL STONE

ONLY THE BEST FOR A SENSITIVE NATURAL PRODUCT

Whether rough, matt or polished to a high shine, natural stone such as marble or granite look smart for decades when they are professionally cleaned and sustainably treated from the outset.

As with all natural products, natural stone is sensitive to daily household and environmental stresses. MELLERUD protection and care products for marble and natural stone are therefore specifically designed to optimally protect surfaces against dirt, grease and oil. For only a surface treatment tailored to the material can give floors, window sills, marble tables or granite worktops a lasting high-quality and cared-for appearance.

Never treat calcareous materials, which includes marble, with acidic cleaners. Any acid – even fruit juice, vinegar or citric acid – will attack this stone. Matt areas instantly appear on polished surfaces. Immediately after installation, natural floors should be protected against stains using MELLERUD Marble & Natural Stone Impregnator.

If lime-free natural stone discolours as a result of iron-containing inclusions, you can stop the rusting process with MELLERUD Tile & Stone Heavy-Duty Cleaner.

11 MELLERUD Granite Floor Clean and Care

Cleaning for particularly demanding surfaces. Granite surfaces in the residential and commercial sector, in the kitchen and bathroom, on floors, worktops and window sills must be cleaned and protected. The active ingredients, which are tailored to granite, clean and care for the surface in one step. The stone is protected from drying out and durably retains its natural beauty.

Available in 1.0 l containers.

12 MELLERUD Marble Clean and Care

Shine without effort. For the maintenance cleaning and care of all marble surfaces – even highly polished ones – and natural or synthetic stone. Use MELLERUD Marble Cleaner and Care, for example, for indoor floors and stairs. Just wipe. It can then be polished to a high shine. Refreshes, provides dirt resistance without making floors slippery.

Available in 1.0 l containers.

13 MELLERUD Marble and Natural Stone Impregnator

Effective protection and easy care. Apply MELLERUD Marble and Natural Stone Impregnator on the thoroughly cleaned and dried out surface of marble, granite, natural and synthetic stone, slate, clinker, ceramic, terracotta and sandstone. Long-term protection against greasy, oily and aqueous dirt. Limescale and water rims can be removed more easily.

Available in 0.5 l containers.

14 MELLERUD Marble Polish

Restores shine. After the stain protection treatment MELLERUD Marble Polish restores shine even on older window sills, tables or walls made from marble, natural and synthetic stone. MELLERUD Marble Polish cleans, treats and protects in one step. Enhances colours, refreshes.

Available in 0.5 l containers.

15 MELLERUD Stone Floor Shine and Protect

Hard-wearing surface protection for all natural and synthetic stone floors, heavy clay ceramic tiles, unglazed ceramic and clay tiles indoors and outdoors. MELLERUD Stone Floor Shine and Protect cares for surfaces and stops dirt penetrating. Use neat for the first treatment. Then just add it to the cleaning water. Also suitable for the general care of PVC.

Available in 0.5 l containers.

LASTING PROTECTION WITH MELLERUD

Stoneware made out of sintered ceramic is frost-proof, highly abrasion resistant and highly resilient. It offers an enormous variety of patterns and the most diverse design possibilities. Yet fine stoneware is also susceptible to stains and dirt.

Even porcelain needs special care. Residues of mortar, adhesive and dirt settle in the micro-fine pores which are abraded and opened during polishing. For this reason support cleaning mechanically using a cleaning pad.

Before walking on your floor made of stoneware for the first time, always treat it with the surface with MELLERUD

Porcelain Stoneware Impregnator. When using polymer-modified mortar, remove the synthetic residues with MELLERUD Heavy-Duty Intensive Cleaner and then get rid of the calcareous dirt using MELLERUD Cement Residue Remover.

Sealers cannot gain a hold on porcelain stoneware as a result of its low absorbency and change the appearance of the stone. For this reason never apply film-forming agents such as treatments that contain wax or acrylate.

16 MELLERUD Porcelain Stoneware Clean and Care

Gentle but intensive. Dirt on high shine and matt porcelain stone tiles, on glazed tiles and shiny stone floors can be removed effortlessly using MELLERUD Porcelain Stoneware Clean and Care. For intensive cleaning and convenient maintenance cleaning, cleans without smears or streaks.

Available in 1.0 l containers.

17 MELLERUD Porcelain Stoneware Impregnator

Reliable protection. The specialist stain protection for matt, natural, highly polished, textured, shaped or fine-finished porcelain stoneware. Protects against oily, greasy and aqueous stains. MELLERUD Porcelain Stoneware Impregnator provides the highest quality stain protection.

Available in 0.5 l containers.

PROTECTION AGAINST DIRT, WEATHER AND ABRASION

A floor is subjected to many stresses over the years: dirt, cleaning agents, water or wear. Outdoors, clinker, plaster, brickwork, rendering and concrete are also exposed to weathering. In these instances, MELLERUD specialist cleaners help to protect and seal.

We recommend always protecting polished surfaces made of granite, marble or porcelain. However, polished and glazed materials should never be sealed. As a result of the low absorbency of these materials, sealers cannot stick to the surface. Moisture causes the sealer layer to detach, resulting in white streaks or spots.

18 MELLERUD Clinker and Ceramic Oil

MELLERUD Clinker and Ceramic Oil refreshes the colour and highlights the texture of clinker, brickwork, clay and split tiles, slate and dry press plates. Protects against dirt, stains and enhances the naturalness of the surfaces. For interior and exterior use.

Available in 1.0 l containers.

19 MELLERUD Colour Enhancer for Stone Surfaces

MELLERUD Colour Enhancer for Stone Surfaces emphasises the natural texture and brings the colours of absorbent natural and synthetic stone to life. Treated surfaces appear fresh, as if they are wet. Reduces the susceptibility to dirt. For interior and exterior use. Particularly suited for artificial stone with a rough surface.

Available in 0.5 l containers.

20 MELLERUD Concrete, Plaster and Paving Impregnator

Reliable dirt repellent. Specialist impregnator for all absorbent natural and synthetic stone surfaces. MELLERUD Concrete, Plaster and Paving Impregnator protects against oily, greasy and aqueous dirt and moisture penetrating. For interior and exterior use on porous wall and floor tiles, paving stones and patio tiles.

Available in 1.0 l containers.

21 MELLERUD Marble and Natural Stone Impregnator

Effective protection and easy care. Apply MELLERUD Marble and Natural Stone Impregnator on the thoroughly cleaned and dried out surface of marble, granite, natural and synthetic stone, slate, clinker, ceramic, terracotta and sandstone. Long-term protection against greasy, oily and aqueous dirt. Limescale and water rims can be removed more easily.

Available in 0.5 l containers.

22 MELLERUD Porcelain Stoneware Impregnator

Reliable protection. The specialist stain protection for matt, natural, highly polished, textured, shaped or fine-finished porcelain stoneware. Protects against oily, greasy and aqueous stains. MELLERUD Porcelain Stoneware Impregnator provides the highest quality stain protection.

Available in 0.5 l containers.

23 MELLERUD Stone Sealer

Long-lasting protection and care. Colourless and waterproof long-term protection with silky gloss. For indoor and outdoor use on all absorbent natural and synthetic stone, for example, slate, marble, sandstone, terrazzo, Solnhofen tiles, concrete, paving slabs etc. Enhances the colour and texture and provides dirt resistance.

Available in 0.5 l and 2.5 l containers.

24 MELLERUD Wall and Masonry Shield

Complete protection against damp. Stops moisture and rain ingress. Makes surfaces water repellent without affecting their breathability. For façades and walls made from limesand brick, clinker, for brickwork, marble, slate, porphyry and clay tiles. Particularly suitable for plaster and concrete.

Available in 0.5 l containers.
